## COMPLAINT

I would like to complain about task n° 22 - RTA, which I received No Result.

According to my calculations I pressed to Logger mark button 2-3 m inside the scoring area, and in the results is saying that I pressed outside by 23 cm.

The logger does not have precision of 23 cm, and according to the:-

Sporting Code  
Section 1

4.7.3.1

Distance  $\pm$  1%

- Competition Handbook

Rule 6.9.2.

Trackpoint  $\pm$  10m

and the Event Director words in the Debriefing, this kind of "rounding up" can not be taken into consideration, I will never press the button

23 cm outside the scroung area.

Therefore, I would like to have my result upheld.
